

The Thomas Leeb Signature Model

Austrian guitarist Thomas Leeb first began to play Lowden guitars in the mid nineties while working closely with his good friend and mentor Eric Roche. Thomas has been playing Lowden guitars since then and it gave George great pleasure to design the Thomas Leeb Signature model.

This guitar has been designed to give a deep, not overly heavy, but free bass response and yet with very full 'fat' trebles right up the neck. The figured Walnut back and sides, Sitka Spruce soundboard and custom Thomas Leeb Walnut scratchplate combine with our 'O' soundbox geometry to make a superbly responsive guitar which is essential for Thomas to be able to give full expression to his multi dimensional music compositions.

The Full Lowden Range
